

Amazing Offer - 30% off our Canvas Prints

Canvas wraps make a beautiful addition to any home. The canvas is carefully stretched onto a wooden frame so that you have an image that, just like a painting, can be hung like any wall decoration. The fine structure of the canvas lends a certain feeling of depth, making the original photograph appear more imposing and giving it that "designer" touch. The depth of the frame helps to enhance this feeling. "A moment immortalised becomes a personal work of art."

Canvas wraps are very effective with both traditional and modern style rooms. If you are unsure of what size to get or how the print might look, you can send us a digital photograph of the wall it is for and we can create a visual to scale (we need the dimension of something in the photograph) to help you ensure you choose the correct size for your use.

The images are printed using a thermal colour printing method with pigmented UV inks onto high-quality Italian artist canvas. The canvas is made up of a cotton mixture (360g/m²) optimised for durability and colour brilliance.

The wooden frames are made of select wood, bound together by several layers of adhesive, delivered by the highest quality sources in Scandinavia. Frames more than 80cm in length are supported by a wooden raster as standard for stability and to prevent warping.

Our amazing 30% off price offer makes it a great time to order a canvas print for yourself or to give as a very special gift.
