Acrylics, box frames and many other products available

The Session:

We look forward to welcoming you to the studio. There are no "rules" on what to wear or how to prepare. We would encourage you to bring a change of clothes so you can get a good choice of images, and we have a changing room with a mirror, hairdryer and straighteners to ensure you can look your best.

Any of your family including pets are welcome. We can take as many groups and combinations as you wish, all without obligation, so if there are relatives or friends that want to attend, please bring them along but can you advise us in advance who is attending.

The Viewing:

After the sitting we will arrange the viewing appointment where we will project your images using our custom designed system which not only lets you compare your images side by side, but also allows us to zoom into images so you can choose the best expressions. If you give us an image of a wall in your home and the size of anything in the shot, we can project your selected image on "your" wall so you can see exactly how it will look framed, and to scale. We have a great range of desk, wall and "collection" products. We can offer you framed prints, prints on canvas, acrylic and other great options.

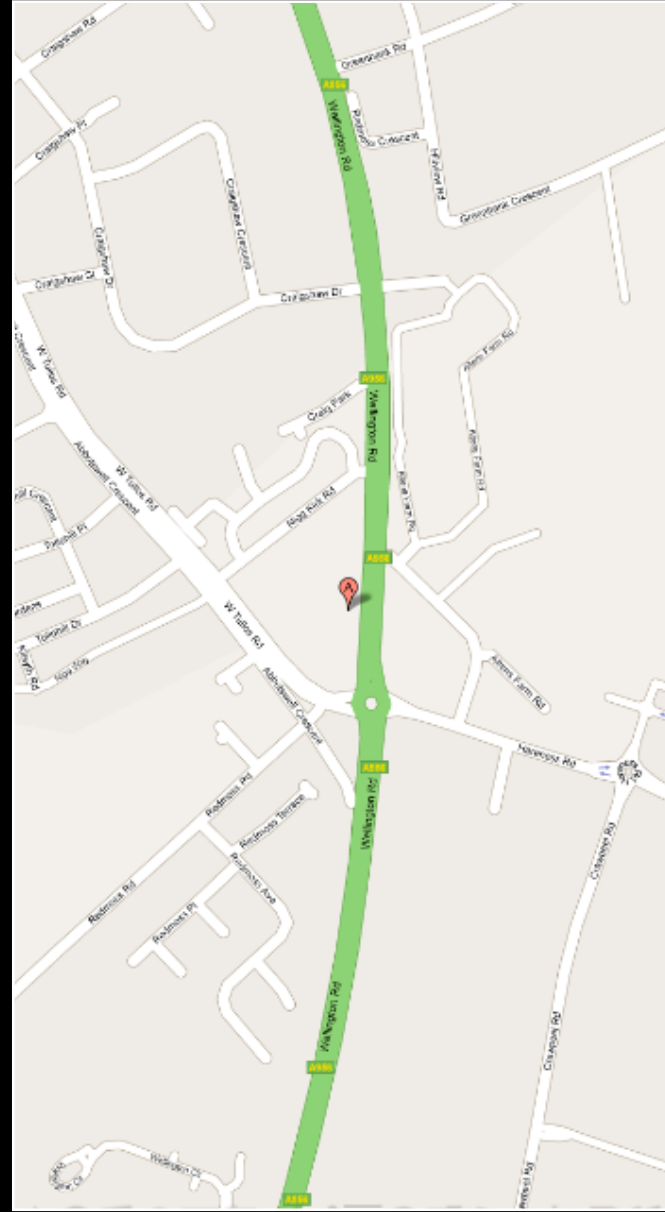

The Alternative:

Photography is changing and all around us there are photographic products available at great prices - on-line, in supermarkets and in high-street stores. if you want to be able to source and create your own prints and display products using our beautiful high quality images, you can upgrade your sitting or offer, to 20 high resolution Jpeg's for only £159. We will put all of your images online (within 48 hours) and you choose those you want and we will post you the disc within a few days.

Our Custom Designed Studio is conveniently situated on Wellington road and there is off street parking at our front door, and we also have our own car park.
